

WAYNE STATE UNIVERSITY OFFICE OF THE REGISTRAR

*Override Code Information*

Code	Description	Information
AUDIT PASS LATE	Audit of Class Approved Pass/No Pass Grading Approved Add after Deadline Permission Granted	These three codes grant the student permission to take a class on an audit or pass/fail grade basis, or to add the class after Pipeline registration has ended for the term. However, these codes do not enable the student to add the classes through Pipeline. Instead, the student must complete (including instructor signature) and submit an <b>Add and Override Approval</b> form to the academic department offering the course.  If approved, the department will enter the appropriate code in SFASRPO and forward the form by campus mail or FAX to the Registration Office. The Registration Office, in turn, will manually register the student for the class.
DEPT	Department Permission Granted	To determine if the class requires departmental approval, access the Class Schedule Section Details form (SSASECT) in Banner. Enter the registration term and the Course Reference Number or CRN at the top, and press enter. In the left column, if you see the value of DP in the Special Approval field, then departmental approval is required.
TIME	Time Conflict Override	To determine if the course has a time conflict, check the information in the Schedule of Classes ( <a href="http://www.classschedule.wayne.edu">www.classschedule.wayne.edu</a> ), or view the scheduled meeting pattern on SSASECT. Once you have accessed the class, select Scheduled Meeting Times from the Options drop-down menu.
CLOSE	Closed/Maximum Enrolled	To determine if this code is appropriate, access the class on SSASECT and select Section Enrollment Information from the Options drop-down menu. Check to see if it has reached its enrollment limit and has closed.
CO REQ PRE REQ	Co-Requisite Requirement Met Pre-Requisite Requirements Met	To determine if the course has a Co-Requisite or Pre-Requisite, check course information in the Schedule of Classes ( <a href="http://www.classschedule.wayne.edu">www.classschedule.wayne.edu</a> ). In addition, the class schedule web site will list information about material fees.
DUPL	Duplicate Courses Allowed	The departments must enter this override code whenever they determine that a student may take (add, register for) the same course more than one time in the same term.
REPEAT	Repeat Course Override	Please note that the University instituted a policy for Fall Term 2006 that requires students to obtain their advisor's approval if they will be repeating a course.
COLL MAJOR CLASS LEVEL DEGREE PROGRAM FIELD	College Restriction Override Major Restriction Override Class (Rank) Restriction Override Level Restriction Override Degree Restriction Override Program Restriction Override Field of Study Restriction Override	To determine if the course has one of these so-called "other" restrictions, view the form SSARRES. As you select the next block function, a box will appear for each of the restrictions (it will be necessary to perform the next block function several times to view all) and you can see if any apply to the course.  <i>The MAJOR and FIELD codes are interchangeable. "Field of Study" is the Banner name for Major.</i>

*To learn how to perform overrides, access the how-to video from the Advisor's Menu in Faculty Pipeline.*

*To see Error Codes applied to a specific student's record, access the SFASTCA form and enter the Banner student ID and registration term.*
